

ALGORA

BRAND IDENTITY GUIDELINES

VERSION 1.0
MAY 2026
CONFIDENTIAL

What is Algora?

Algora is a bilingual algorithms and problem-solving education platform built for developers worldwide. The name combines "Algorithm" with "Ora" (light in Latin), symbolizing enlightenment through code. Algora empowers developers to master computational thinking with an AI-powered learning assistant.

FIRST DESIGN

Brand Personality

Algora is intelligent yet approachable, technical yet human. It represents the intersection of deep computer science knowledge and modern AI-assisted learning. The brand speaks with clarity and precision, never overwhelming, always guiding.

Design Philosophy

The visual identity follows a "Dark-First" philosophy, reflecting the natural environment where developers feel most comfortable. The golden amber accent represents the spark of understanding - that moment when a complex algorithm finally clicks.

Primary Palette

The Algora color system is built on a dark foundation with golden amber as the primary accent. Every color serves a specific purpose, ensuring visual clarity during intensive coding sessions.

 Deep Void #0D0D12 <i>Primary background</i>	 Midnight Code #161622 <i>Secondary / Editor BG</i>	 Nebula #1A1A2E <i>Cards / Sections</i>
 Golden Amber #F59E0B <i>Primary accent / CTAs</i>	 Emerald Signal #10B981 <i>Success / Easy</i>	 Nebula Purple #6366F1 <i>AI Assistant / Secondary</i>

Primary Logo

The Algora logo combines geometric code syntax with an algorithmic tree structure, representing the fusion of programming fundamentals and computational thinking.

ALGORA

Master Algorithms. Code the Future.

Logo Concepts

ALGORA

ALGORA

ALGORA

CONCEPT A

Code Bracket

Abstract < > symbols forming a stylized A. Represents code syntax as the foundation of all programming.

ALGORA

ALGORA

ALGORA

CONCEPT B

Algorithm Tree

Binary tree node structure with golden connections. Represents data structures and hierarchical thinking.

ALGORA

ALGORA

ALGORA

CONCEPT C

Syntax A

Letter A integrated with code syntax elements. Represents the fusion of alphabet and algorithm.

Type System

Algora uses two font families: Inter for UI text and headings, IBM Plex Mono for code and metadata. This creates clear visual separation between content and code.

INTER / PRIMARY FAMILY

Brand Rules

Consistent application ensures the Algora brand remains cohesive across all touchpoints, from the web platform to social media and print materials.

DO

Maintain clear space around the logo. Use it on dark backgrounds. Keep golden amber for primary CTAs only. Use Inter for text and IBM Plex Mono for code. Maintain RTL support for Arabic content.

DO

Keep body text at 14-16px for readability. Use semantic color meanings consistently. Test all pages in both RTL and LTR layouts. Ensure minimum contrast ratio of 4.5:1 for body text.

DON'T

Never stretch, rotate, or distort the logo. Never place it on busy backgrounds. Never use golden accent for more than one primary CTA per screen. Never use light mode as the default.

DON'T

Never use more than 5 distinct colors per page. Never mix Google Translate with hand-crafted content. Never use decorative borders on body pages. Never add stock images or clipart for decoration.
