

What is Algora?

Algora is a bilingual algorithms and problem-solving education platform built for developers worldwide. The name combines "Algorithm" with "Ora" (light in Latin), symbolizing enlightenment through code. Algora empowers developers to master computational thinking with an AI-powered learning assistant.

Design Philosophy

The visual identity follows a "Dark-First" philosophy, reflecting the natural environment where developers feel most comfortable. The golden amber accent represents the spark of understanding - that moment when a complex algorithm finally clicks.
